10-101: Mouse IgG1 Isotype Control (Clone: MOPC31C)

Clonality: Monoclonal
Clone Name: MOPC31C
Application: IHC,FACS
Reactivity: Human
Format: Purified
Isotype: Mouse IgG1

Description

A mouse isotype control is an antibody of the same class (isotype) of immunoglobulin as the specific mouse antibody, but is either myeloma-derived antibody of unknown specificity or is raised against an antigen that is presumed not to be present on or in the cells under study. Isotype control antibodies are used for the estimation of non-specific binding of target primary antibodies to cell surface antigens.

Product Info

Amount : 100 μg

Purification: Affinity Chromatography

Content: 25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium

azide is highly toxic.

Storage condition:

Storage condition:

Store the mouse isotype control at 4°C, stable for 6 months. For long-term storage, store at -20°C.

Avoid repeated freeze and thaw cycles.

Application Note

FACS: 0.25-2 µg/10^6 cells

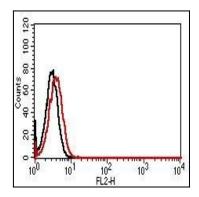

Fig-1: Cell surface flow analysis of Mouse IgG1 isotype control in Jurkat cell line using 2 μg/10⁶ cells (Clone: MOPC31C). Black represents cell only; red represents Mouse IgG1 isotype control. Goat anti-mouse PE conjugate was used as secondary antibody.
